Subject:	April 17 SAB Meeting

Here are my thoughts for the April 17 SAB meeting.

The purpose of this meeting is to review the SDS/SDC for EHCSS-JLI. Therefore, I don't think we need to do presentations (with a few minor exceptions). All of the information is in the documents and should be clear enough without a separate presentation.

I would open the meeting with a brief overview of where we are in the process and a review of the expectations for the meeting.
This would be followed by a closed session of the SAB so that they can review in private their comments and suggestions.
Based on the closed session the SAB would bring those comments forward to a small group of PM people for discussion.
We should then provide the SAB with an update of where we are with: JLI menthol, series K testing, and SCoR. This would be very top line (one or two slides per subject). I suggest that Ken give this presentation.

Present at the meeting:
Solana
Patskan
Werley
Mendes
a PMRL person who is knowledgeable about the nonclinical content of the SDS/SDC
Podraza

Available by phone:
Roethig
Unverdorben
Tricker
von Holt/Schleef
McKinney
Cruise/Wrenn
Elves
Zimmermann
appropriate PMRL people

I'm flexible regarding these lists.

I have asked the SAB members to provide any comments they have prior to the meeting that could change the content of people at the meeting or the need for specific presentation.

I am still trying to reach Ron Estabrook to go over this with him.

Thanks,
George
